## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election without traverse of Claims 1-11, and 19-20 in the reply filed on 11/21/2005 is acknowledged.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

### ***Specification***

The abstract of the disclosure is objected to because the abstract of the disclosure does not commence on a separate sheet in accordance with 37 CFR 1.52(b)(4). A new abstract of the disclosure is required and must be presented on a separate sheet, apart from any other text.

Correction is required. See MPEP § 608.01(b).

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3767

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-11, 19-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Sibalis (U.S. Patent Number 5,328,452).

Sibalis discloses a multi signal electrical transdermal drug applicator with a current generator (38), first and second electrodes (20, 30), modulator (46), vehicle and active compound (12). The Sibalis device is used for the transdermal delivery of a drug to the patient through the skin (see paragraphs at column 2-3). The Sibalis device contains a modulator with amplitude between zero and a maximum value, a current with a positive sinusoidal, rectified sinusoidal, half-sinusoidal, triangular, sawtooth, or square waveforms. The Sibalis device does disclose the applicant's frequency ranges of between 100 to 3000 Hz and 0.1 to 5 Hz, with between 2500 Hz plus or minus 1000, or 0.025 Hz – 10 Hz (see paragraphs beginning at column 4, line 38, to column 8, line 42). Sibalis discloses that all frequencies, pulse widths, repetition rates, amplitudes, ect. (see paragraph at column 5, line 5 to column 5, line 10).

### ***Response to Arguments***

Applicant's arguments with respect to claims 1-11 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

Art Unit: 3767

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
